How to Make Your Own UNE Moodle iPhone Shortcut

This step-by-step guide will show you how to create a shortcut to the UNE Moodle site on your iPhone that looks like and sits alongside your regular apps. This can be a helpful way to stay up to date with your UNE course materials and information, as well as a way to interact with peers in a more portable format than your regular computer.

1) Open the Safari App.

2) At the top of the screen, type in the address of the UNE Moodle website:

moodle.une.edu.au

3) Tap the arrow icon found in the middle of the bottom of the screen.
4) From this list, select *Add to Home Screen*.

5) The UNE logo should now appear. Press the blue *Add* button to add this icon.
6) A UNE Moodle shortcut should now appear on your iPhone’s home screen. By clicking on this shortcut, you will be taken to the UNE Moodle site for you to log in.
